Solutions

not only...

Windows

Sound Resistant Windows

Now a days sound pollution disturb our living. Office , Home, Hospitals, Hotels and many places are affecting with sound pollution.

For separation of Sound , the space should be sealed. This is possible when windows and doors will be sealed.

Utility Windows are sealed from all the corners. Sliding shutters are sealed by Silicon Based Weather Strips.

The gap between wall and window is filled with silicon.

No space left for sound to come in

Dust Proof

Utility Windows are sealed from all the corners. Sliding shutters are sealed by Silicon Based Weather Strips. The gap between wall and window is filled with silicon. No space left for dust to come in

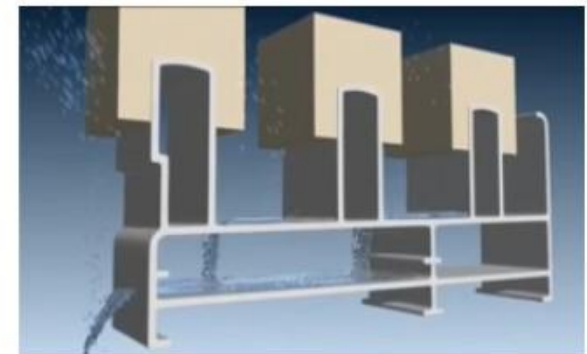

Storm Resistant Window

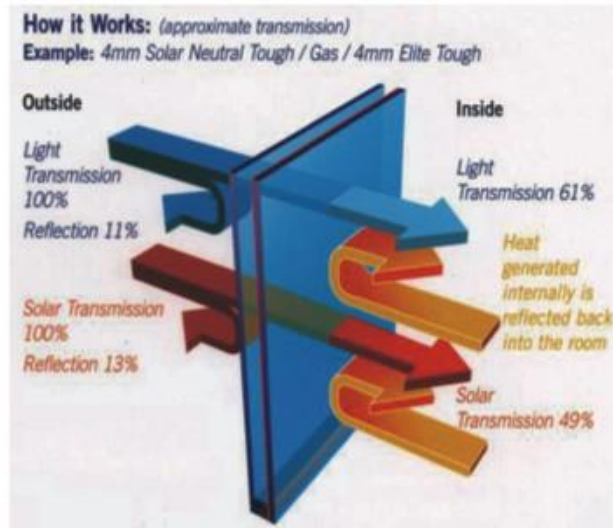

As these are Aluminium windows, designed technically to sustain wind pressure. These are strong enough to sustain high velocity wind.

Water proof Window

In rainy days water comes from the windows. We always consider it as a part of season. Utility Windows has arrangement of water drain. Water showering will restrict by broad design of shutters. Rain Water will flow out from the slop at bottom of window frame. Extra force will restrict by collar of frame.

Heat Resistant

We all are experiencing Global Warming. We use DGU (Double Glass Unit) in Utility Windows. This is a sandwich panel with a vacuum in between two glasses. We use sandwich panel as

18 mm DGU glass (4 mm Toughened Glass + 10 mm Spacer + 4 mm Toughened Glass)

25 mm DGU glass (5 mm Toughened Glass + 15 mm Spacer + 5 mm Toughened Glass)

This DGU glass allows light to pass and not heat.

This help to reduce consumption of Air Conditioner . It reduces electricity bill.

Eco Friendly

As all measures are taken to balance ECO Systems.

Utility Windows are also recommended by Green Building consultants.

Hard Ware and Accessories

For smooth and fast rolling we use self designed Roller bearings & Ball Bearings.

EPDM is used to fix the glass in shutters

Silicon Based Weather Strips are used to restricts dust.

Self Pressing locks, manual locks & handle locks are used.

Powder Coating

Anodizing

Wooden Finish

More than
200 colour shades
are **available.**

For L Shape or Corner Window
